Emtek Door Handing Chart

The handing of a door is always determined from the outside.

- The outside of an exterior door is the street or entrance side
- The outside of a room door is the hall side
- The outside of a closet door is the room or hall side
- The outside of a single communicating door is the side from which the hinges are not visible when the door is closed

ROCKY MOUNTAIN HARDWARE MORTISE LOCKS

Rocky Mountain Hardware products are made of solid bronze. Hand applied patinas enhance the hues of the bronze creating an aged appearance. Over time, touch and climate work with the bronze and the patina to create a unique finish. Silicon bronze contains copper, silicon and zinc and is a coppery gold color. White bronze is composed of copper, manganese, nickel and zinc producing a silver color.

All Special Order,
8-10 Week
Lead Time

In addition to the two bronze choices and twelve patina options, Rocky Mountain Hardware is designed to be freely interchangeable. This allows for countless arrangements of escutcheons with levers, knobs, rings or grips. A variety of settings and styles can be effortlessly combined. Entries work with Baldwin cylinders and mortise locks. The following is a small sampling of the many mortise handleset configurations that are available:

ROCKY MOUNTAIN LOCKS

ROCKY MOUNTAIN HARDWARE BUILDERS SERIES

2 Solid bronze architectural hardware. In their Builders Series, Rocky Mountain has combined its traditional custom process with a streamlined production technique. This results in a more competitively priced product without compromising the exceptional Rocky Mountain quality.

The Builder Series offers eight escutcheons that can be combined with a choice of two knobs and two levers. All Rocky Mountain Hardware finishes are available. Special Order, 8-10 week lead time.

Price List

All finishes are priced the same. Escutcheon determines price. (Choice of Knob or Lever does not effect price.)
